Objectives

To secure a position as a Next.js developer where I can utilize my skills in Tailwind CSS and create multiple websites using the Next.js framework. I am a fast learner, eager to expand my knowledge by mastering backend technologies such as API development, headless CMS integration, and database management. My goal is to contribute to innovative web development projects, delivering efficient and user-friendly solutions while continuously enhancing my expertise in full-stack development.

Skills

Next.js:
- Proficiency in Next.js framework, including routing, rendering, and data fetching.
- Understanding of Next.js concepts such as pages, components, and layouts.
- Experience with client-side rendering (CSR) and static site generation (SSG) using Next.js

React.js:
- Strong understanding of React.js and its component-based architecture.
- Experience in building responsive and interactive user interfaces using React.js.
- Familiarity with React hooks for state management and component lifecycle

Tailwind CSS:
- Proficiency in using Tailwind CSS utility classes to style and layout components.
- Knowledge of Tailwind CSS configuration and customization options.
- Understanding of responsive design principles and implementing them with Tailwind CSS.
